

**ABSTRACT OF THE DISCLOSURE**

5           A sailing accessory for selectively receiving and holding  
personal accessories of a user and providing convenient access to  
the accessories for a helmsman. The sailing accessory includes a  
top member and a bottom member. The top member includes a slot  
which extends therethrough. The slot is designed for receiving a top  
10 portion of a pedestal guard. The top member defines a work surface.  
The bottom member is operationally coupled to the top member.  
The bottom member includes a front edge designed for abutting a  
back side of the pedestal guard.
